

As a wife and a mother of two children I have a tough time listening to the radio with my family. I am tired of the d.j.s with foul language and constant demeaning of anybody they choose. The sexual context has gotten so far out of hand that even I as an adult have chosen to listen to c.d.s only. I quit listening to the radio until someone told me about K-Love & Air 1. Now I listen to music and I get to hear my children sing along to songs that are positive and all age appropriate. When the d.j.s talk they talk about how to raise a strong family and treat others with respect. I will only listen to the radio if it has a positive influence on myself and my family. I live in Southern Oregon and hope you continue with these great radio stations. Thank you for making a positive stand against constant filth.
